

## CARIBBEAN EMERGENCY VECTOR RESPONSE

### Personal Indoor Checklist

- 1. **Cisterns.** Management: seal cistern with tightly fitted concrete covers. Outlets and down-spouts should be sealed with mosquito netting.
- 2. **Flower vases.** Management: plant flowers in dirt instead or put gravel or ornamental stones in. But keep the water level below the stones.
- 3. **Buckets and pails.** Management: bucket and other types of containers used to store water indoors should be tightly covered with mosquito netting or cheese-cloth.
- 4. **Flower pots with saucers.** Management: weekly empty and wipe saucers clean to eliminate and mosquitoes breeding in the water collected.

*Eliminate All Standing  
Water* **INDOOR &  
OUTDOORS!**

### Outdoor Breeding Ground Checklist

- 1. Cisterns/wells
- 2. Barrels/drums
